CANEL

For special places kneaded by love...

Marble which has been a favorite material for the construction sector and used in coating of bases, interior walls and fronts, is preferred for decorations of different places such as monuments, sculptures.

Qualified as a natural stone, the marble is gaining configuration by Canel today.

Taking the relation of human being to this stone into consideration, our company serves and contributes to places worth of living.

Canel has a different concept always preferred amongst its rivals with its know-how, its products of high quality, aesthetic selections. Being a real solution partner with its high-tech machine track, our company is happy to serve our esteemed clients.

Turkey is at the forefront of the world countries in marble variability and Canel presents its products to its clients in every corner of the world with the "Canel Quality Assurance".

Our modern plants equipped by high technology are working within a conception of in-time production and absolute customer satisfaction.

Today it is possible for you to see products of Canel in all areas where marble is used in beautiful forms.

In today's business life in which the borders has been removed and the competition has become heated, our contribution to modern and classic architecture is the greatest pleasure of Canel.

Thanks very much to our clients accompanying us in this long journey... As we said before; marble is;

A passion...

Respectfully yours...

Canel Mining Co.
